

WALL CLADDING **POLYCLAD PLUS PU**

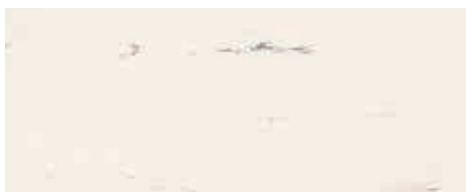

Polyclad Plus PU is a tough, durable and flexible vinyl wall and ceiling cladding featuring the protection of a polyurethane surface treatment.

Available in soft pastel shades and featuring a subtle marbled decoration, **Polyclad Plus PU** has been designed to be welded to Polyflor floorcoverings, to provide a floor-to-wall surface that offers an excellent barrier to dirt and infection.

Welded Polyclad creates an impervious, continuous surface which offers no sanctuary to dirt and bacteria and will not shed dust.
